

WHY UV

More swimming pools are switching to UV systems based on their reliability and impressive success rates, and is accepted without question as effective against Cryptosporidium.

The function of a UV system in a swimming pool is threefold-

- Destruction of Chloramines
- Effective Disinfection
- Oxidation of Organic Contaminants

The main benefits of UV systems are -

- Increased bather comfort
- Increased employee comfort
- Reduced need for expensive dilution (reduced water costs and heating bills)
- Protection against Cryptosporidium and Giardia
- Lowered chlorine residuals
- Reduced levels of trihalomethanes (THMs)
- Reduced corrosion of steel structures
- Reduced maintenance
- Reduced health risk to bathers and employees
- Improvement of water clarity

If you would like to discuss how UV can benefit your pool, or any other equipment and service please call **Karen on 01246 857000 option 2** or reply to this email and one of our team will call you back.
